

~ Higher Light ~

To Tree of Light visitors:

Contained in the trunk of the Tree are excerpts from the body of wisdom that has nourished this group experiment from the start. The passages quoted here are drawn from letters transmitted to a group of souls who agreed to work cooperatively with the spiritual Hierarchy. They describe how these two realms of Earth's life—human and spiritual— will co-create a new world civilization.

These writings contain the assurance that what is occurring in the world at present is aligned with the plan of evolution. The spiritual forces that brought the human race to this point of emergence are swinging the planet in a new direction, as the influence of matter wanes and the influence of Spirit grows.

The authors of these writings are members of the spiritual Hierarchy of Earth and guardians of its evolutionary unfoldment. Their presence in the planetary life will become increasingly familiar as humanity enters the new era. These Beings struggled for lifetimes with the pain and sorrow of everyday human living on the physical plane and achieved mastery. They have walked the spiritual path and 'graduated' from the material plane to reside on a subtler dimension from where they guide our evolution.

These elder Brothers and Sisters are characterized by enduring love, boundless wisdom, and the will to work tirelessly to actualize the divine plan of evolution. They are committed to guiding those who seek to know the eternal

truths and how they apply to this pivotal moment in evolution, as humanity awakens to its destined role.

The excerpts offered below are intended to shed light on the human journey through these times of tumultuous change. They are arranged in 3 sections:

- The Existence of the Kingdom of Souls
- The Reality of the Soul
- The Divine Plan

You will note there are words in these texts that are capitalized sometimes, but not always. The capitalization is done for two reasons: to give emphasis to those words in a given context, and to indicate a higher aspect of their meaning. For example, "Love" indicates divine or universal love.
