

INSPIRATION FOR THE WEEK

“Fear is losing ground to love, of this We can assure you. The heart of humanity is opening as never before. People are looking toward the light of truth, and hope, and love, and this Light is forthcoming. Some see it in the supposed entry of our solar system into an intensified field of photonic light, or in the current display of solar energies entering Earth’s atmosphere on a scale unprecedented. Others see it in the growing light of human consciousness. In whatever ways one may sense the dawning light of a new era, physically or spiritually, it is being felt by sensitive souls everywhere.”
